

ARTROGLYCAN PLUS

Introduction:

Artroglycan Plus combines Low Molecular Weight Chondroitin Sulfate with glucosamine, sodium ascorbate and manganese, if these molecules are associated; they synergize their chondroprotective and chondroreparative action. This provides more absorption, distribution and bioavailability in the action site.

Action:

Artroglycan Plus is a stimulant of the synthesis of proteoglycanos.

The low molecular weight chondroitin sulfate repairs loss caused by damaged cartilage more quickly.

The manganese is an essential cofactor for the mitochondrial superoxide dismutase inhibiting oxidative damages.

The ascorbate provides vitamin C activity and acts as a strong oxidant and therefore as a grabber of free radicals that degrade cartilage, reducing in this way the consequent inflammation.

Antiarthrosic, antiarthritic and articular cartilage regenerator.

Formula:

Each tablet contains:

Low Molecular Weight Chondroitin Sulfate.....	200 mg
Glucosamine hydrochloride	300 mg
Sodium Ascorbate	150 mg
Manganese Sulfate	4 mg
Excipients e.q.....	950 mg

Species which the veterinary medicinal product is intended for:

Canines and Felines

Therapeutic indications:

Artroglycan Plus is a product destined to the treatment of patients with chronic and severe articular disease, to avoid an advance in joint deterioration and alleviate symptoms by improving the quality of life.

It is specially destined in elderly patients.

Non-infectious arthritis, osteoarthritis, arthrosis, hydrarthrosis and other degenerative arthropathies, chondropathies, sinovitis, tendinitis. Co-adjuvant in the treatment and prophylaxis of osteoarticular pathologies, co-adjuvant in fracture repair and after osteoarticular surgeries. Osteochondrosis. Articular anti-inflammatory.

Route of administration:

Oral administration

Pharmaceutical form:

Tablets.

Dosage:

Tablets must be administered according the following table, alone or mixed with food during a month or more, according to the criteria of the Veterinarian. It is suitable for prolonged treatments due to its safety property.

KILOS OF LIVE WEIGHT	TABLETS PER DAY
<10	1
10-25	2
>25	3

Dogs of heavy breeds (more than 40 kg) may need a larger amount of tablets, 4 tablets per day could be a suitable quantity, considering that a part of the weight of these animals corresponds to an important muscular mass. Due to the indication of the product for chronic moderate and severe pathologies, it is suggested a prolonged treatment, without interruptions in order to maintain the patient with the symptoms controlled permanently.

Side effects:

Hypersensitivity to any component.

Commercial presentation:

-Cardboard box containing 60 tablets (6 blisters) of Low Molecular Weight Chondroitin Sulfate 200 mg/tablet.

Precautions:

The product should be preserved at room temperature and protected from light.
